[Camstudio Mac Download](#)

So where can I get it and how much does it cost?

You can download and use it completely free - yep - completely 100% free for your personal and commercial projects as CamStudio and the Codec are released under the GPL (for more details on this license, [click here](#).)

There are no royalties or any monies to pay - although if you do use it for a commercial product, I wouldn't say no to a copy of whatever you produce 😊

FAQ:
<http://camstudio.org/faq.htm>

To manually install the codec, download the zipfile version, extract the contents to a folder, right click the camcodec.inf file and select Install.

If you don't have a lot of experience or just plain can't be bothered with all that mucking around [grin], download the EXE version and double click it to begin the install process.
