0.2. This is the end of the life of the Foundation Advanced Series 1. A number of improvements have been made and we would like to give you a brief overview of the changes. In this report I want to describe what new version means for you: 1. No new releases are planned. This means that from now on the only upgrades available are bug fixes and improvements. 2. New version is free. This means that you don't have to purchase new versions of a software. You can simply upgrade to the latest version for free. 3. New version includes minor changes in formulas. I will also provide an overview of the changes in the following report. 4. The latest version of the software is 6.1.0.1. (To access the new version you need to have purchased the license for SELECT Series 1. It can be activated within no more than 24 hours.) 5. New version is equipped with new add-ons. This means that you can try out a new version of the software with some of the new features available. All new functions are available. They will become available when new version is installed. Some other reports on new features and bugs can be found in the following link: Let's start. ADD-ONS There are two new add-ons included in this new version of the software. They are called: - Customer Management. - Find Duplicates. (1) Customer Management In this add-on we have introduced a new feature that can be found in the Data Management screen. If you click on the (System) drop-down menu next to Order lines you can select the type of a document: In the following screenshot you can see a sample of data entry in which a document was created on a Bill of Materials screen: With the Customer Management add-on you can use this document as an entry to the Customer Management screen. (2) Find Duplicates The other add-on is the Find Duplicates. When you enter a transaction code and click on the "Find" button a new tab will open in which you can find and compare a document from a different order. 82157476a
